Office Action Summary	Application No. 10/559,592	Applicant(s) LOOTZ ET AL.	
	Examiner JONATHAN R. STROUD	Art Unit 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Claims 13-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08/19/2008.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 6, 7, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Frantzen 5,741,327.
4. Re claim 1, Frantzen discloses a connecting system of a stent 50 to a radiopaque marker 130 comprising at least one gripping connection 67 comprising a gripping element 67 and a clamping element 130.
5. Re claim 2, Frantzen discloses an embodiment where the marker itself is in the form of a gripping or clamping element of the connection, 130.
6. Re claim 6, Frantzen discloses the gripping or clamping element is formed on the basic structure of a stent 50, see fig. 16.
7. Re claim 7, Frantzen discloses doing so as not to project from the stent, abstract.
8. Re claim 8, Frantzen discloses the element is formed at the proximal end of the stent, fig. 16.

Art Unit: 3774

9. Re claim 10, Frantzen discloses a self-expanding stent, col. 7 ll. 59-65.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 3-5, 9, 11-2 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frantzen 5,741,327 further in view of Haindl 5,931,867.
12. Frantzen teaches the device as claimed and as discussed above.
13. Frantzen fails to teach various materials and material properties of the markers and the stent.
14. Haindl teaches using any material from the Markush group listed on col. 2 ll. 60-67 of Haindl's specification, including Ptlr, proving that these materials are known equivalents in the art. Haindl also discloses using biologically compatible materials, as do any number of other patents in the art.
15. The prior art element performs the identical function specified in the claim in substantially the same way, and produces substantially the same results as the corresponding element disclosed in the specification. *Kemco Sales, Inc. v. Control Papers Co.*, 208 F.3d 1352, 54 USPQ2d 1308. Further, a person of ordinary skill in the art would have recognized the interchangeability of the element shown in the prior art for the corresponding element disclosed in the specification. *Caterpillar Inc. v. Deere &*

Art Unit: 3774

Co., 224 F.3d 1374, 55 USPQ2d 1305 (Fed. Cir. 2000); Al-Site Corp. v. VSI Int'l, Inc., 174 F.3d 1308, 1316, 50 USPQ2d 1161, 1165 (Fed. Cir. 1999); Chiuminatta Concrete Concepts, Inc. v. Cardinal Indus. Inc., 145 F.3d 1303, 1309, 46 USPQ2d 1752, 1757 (Fed. Cir. 1998); Lockheed Aircraft Corp. v. United States, 193 USPQ 449, 461 (Ct. Cl. 1977); Data Line Corp. v. Micro Technologies, Inc., 813 F.2d 1196, 1 USPQ2d 2052 (Fed. Cir. 1987). See MPEP 2183.

16. It would have been obvious to one of ordinary skill in the art to substitute any known equivalent material for the materials not disclosed in Frantzen, as is taught by Haindl and any other number of patents. Since it has been held that known equivalents can be considered obvious to one of ordinary skill in the art.

Conclusion
